WORK EXPERIENCE

AMAZON WAREHOUSE | Distribution Center Associate | Union City, GA

Nov 2024 - Nov 2024

- Operated powered industrial trucks (PIT) to stow inventory while utilizing barcode scanning and warehouse management systems for accurate tracking. Leveraged the Inbound Destination Recommendation Tool (IDRT) and troubleshooting skills to optimize workflows and maintain productivity in a fast-paced, tech-driven environment.

VN ACCOUNTING & TAX | Data Entry Clerk | Lake City, GA

Jan 2023 - Apr 2023

- Using QuickBooks, ensure precise recording of deposits and check writing. Improved efficiency by 30% through streamlined data management practices, contributing to enhanced financial record accuracy.

K&G FASHION SUPERSTORE | Associate | Atlanta, GA

Sep 2019 – Present

- Proficient in customer service and optimizing transaction efficiency using computerized point-of-sale systems, achieving a 20% reduction in processing time. Skilled in stock organization, inspecting and preparing merchandise deliveries, and leveraging computer systems to ensure inventory availability.

PROJECTS

OWO DISCORD BOT – AUTO PLAY | Automated Gameplay Bot for Owo Game

Jun 2024

- Developed a Node.js application to manage multiple account for automating game functions in OWO.
- The implemented features include capturing embed messages, handling captchas through music and HTML Gmail notifications, automating gameplay for three gambling activities with a 65% success rate to maximize profit, and efficiently completing all game quests.
- Integrated a chat command interface and stable status display for flexible control and monitoring of game actions.

GSU REVIEWHUB | A Full-Stack Course Review Website

Apr 2024

- A platform streamlining course reviews and discovery at GSU, featuring authentication, user/admin dashboards, dynamic MySQL data retrieval, user comments, and admin-friendly Excel uploads for data management.

HANDWRITTEN DIGIT PREDICTION | A Prediction Website

Mar 2024

- Led a team of 3 in developing a handwritten digit recognition website. Achieved the key functionality of accurately predicting handwritten digits from images, employing iterative model training and rigorous experimentation to optimize performance and reliability. Deployed the website on Oracle Cloud to make it accessible to users.

BAD HABITS WEB | A Full-Stack Ecommerce Website

Nov 2023

- Developed a full-stack e-commerce platform with ReactJS for the frontend, NodeJS for the backend, and MySQL for the database, engaging a team of 5 contributors.
- Achieved key functionalities, including Authentication using JSON Web Tokens, and User / Admin Dashboard.
- Designed and integrated RESTful APIs to facilitate seamless communication between the front and back end, ensuring efficient data retrieval and manipulation.
- Implemented dynamic data retrieval from the database, enabling seamless display and management of items on the dashboard, contributing to a 20% increase in overall platform traffic.

LEAF CHAT | A Full-Stack Mobile Chat App

Dec 2022

- Developed a React Native mobile app using Firebase and Expo, featuring Firebase Authentication for user security, avatar customization, and global messaging.
- Conducted a successful demo with a 2% increase in user engagement, showcasing the app's functionality and user-friendly interface.
